

GDPR Ongoing Compliance Services

GDPR compliance is not a one-time activity. All organisations have an ongoing obligation to maintain compliance with the law to protect personal data.

For organisations with simple personal data processing activities, maintenance can mean as little as an annual 'health check' of the procedures and controls in place for personal data processing.

Organisations with more complex personal data processing activities will need to do more, and perhaps even appoint a Data Protection Officer.

For a fraction of the cost of employing an in-house resource, why not outsource the maintenance of GDPR compliance to our experienced professionals?

Annual Compliance Audit

Sufficient for organisations with simple personal data processing activities. One day per year to:

- ✓ Review and update relevant records and documentation
- ✓ Audit your security controls and compliance with GDPR
- ✓ Renew your compliance audit certificate authorised by our Data Protection Officer
